

e-ESO PATHWAYS – Q&A

WHAT IS A PATHWAY?

A pathway is an easy and ready-to-use educational track that allows you to expand your knowledge on a specific topic.

Each pathway is made up of a series of concise, mandatory video e-sessions (minimum 6, maximum 10 e-sessions per pathway). Some pathways also have additional slide-only sessions which permit you to delve further into your subject of choice.

HOW DO PATHWAYS WORK?

On each pathway page, you will find a list of sessions that are part of the track. There is a coloured button for each session, showing your progress:

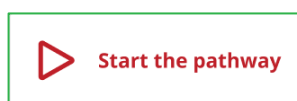

GREEN = complete;

YELLOW = in progress.

A session is considered completed once you have filled in the final online test(s) and collected your completion certificate.

HOW DO I START A PATHWAY?

Our system stores all the information related to your progress for each single session. You need

to activate the pathways you are interested in in order to receive notifications regarding your pathways and to get your pathway certificate once you have attended all the mandatory sessions.

DO PATHWAYS HAVE A DEADLINE?

Yes. Some pathways expire and the deadline is clearly indicated on the pathway's page.

Please note that pathways are constantly updated. Some older sessions of a pathway might be substituted with more updated versions. If you have already completed the previous version of a session, you will not have to view the new one in order to complete the pathway.

If you haven't viewed the previous version of a session that has been updated, you will have to complete the new version of the pathway (i.e. with the updated session/s).

The moment an old session is substituted with a new version, you will be notified and you will have two months to complete the old version. After two months, the old pathway will no longer be accessible, but you will still be able to complete the new version and your progress within the previous version will be maintained.

DO I GET A CERTIFICATE FOR EACH PATHWAY?

Yes. You can request your completion certificate, the moment you have completed all the mandatory video e-sessions of a pathway.

You will also be awarded with 2 ESCO credits for each completed pathway (for more information about ESCO please visit www.ESCO.net).

CAN I COMPLETE A NEW VERSION OF A PATHWAY THAT I HAVE ALREADY COMPLETED?

Yes, but you will not receive a new certificate unless the new version is substantially different from the one you have already completed (more than half of the sessions have been updated).
